

JAMIU TUNDE SULEIMAN

Daehyeon-ro 9-gil, Buk-gu, Daegu, South Korea
Jamiu.suleiman111@gmail.com — <https://tundeh.github.io/>

EDUCATION

Kyungpook National University , Daegu, South Korea <i>PhD in Electronics and Electrical Engineering</i>	Mar 2025 — Present
Kyungpook National University , Daegu, South Korea <i>Master of Science in Electronics and Electrical Engineering</i>	Mar 2023 — Feb 2025 GPA: 4.08/4.3
Bayero University , Kano, Nigeria <i>Bachelor of Engineering in Computer Engineering</i>	2013 — 2018 GPA: 3.82/5.00

RESEARCH EXPERIENCE

Kyungpook National University <i>Graduate Researcher</i>	Daegu, South Korea Mar 2023 — Present
--	--

- Implemented advanced data augmentation techniques to enhance ancient artefact character recognition, achieving over a 10% performance improvement compared to baseline deep learning models.
- Investigated the use of rationales generated by large reasoning models to evaluate passage relevance in Retrieval-Augmented Generation (RAG) systems for personalized tasks.
- Studied uncertainty estimation in LLMs via signal aggregation techniques

Machine Learning Collective (MLC) <i>Researcher</i>	Remote Feb 2023 — Present
---	------------------------------

- Developed a de-identification pipeline for personal information in sensitive document datasets.
- Investigated data augmentation techniques (e.g., paraphrasing, back-translation, storytelling) for low-resource African languages, boosting BLEU scores by 25%.
- Evaluated reasoning abilities of multimodal LLMs using Rebus puzzles, revealing that performance on difficult puzzles remains under 20%.

HONORS, AWARDS & SCHOLARSHIPS

- **Kyungpook National University Graduate Scholarship** Daegu, South Korea
Awarded full scholarship for academic excellence in the M.Sc. Electronics and Electrical Engineering program. 2023–2025

- **Conference Paper Recognition**

Best Paper Award on GAN-based augmentation for character datasets at the International Conference on Convergence Contents. (Url) Yamaguchi, Japan
Feb 2024

PRESENTATIONS AND LECTURES

- Generative Adversarial Network Models for Augmenting Digit and Character Datasets Embedded in Standard Markings on Ship Bodies.

International Conference on Big Data, IoT and Cloud Computing, Jeju, South Korea, Aug 16–18, 2023.

PROFESSIONAL EXPERIENCE

MyClinify

Software Engineer

Ontario (Remote)

Mar 2021 — Oct 2021

- Developed Clinify admin dashboard using React.js, integrated with GraphQL API.
- Designed backend services using Next.js, GraphQL, and PostgreSQL to optimize admin workflows.

Build4SDG Cohort 2

Software Developer

Nigeria

2020 — 2020

- Built user-facing components of a web platform using React.js, enhancing interface responsiveness and contributing to a 25% increase in user engagement.
- Integrated ReactJS frontend modules with a Django REST API, improving data flow efficiency and reducing page load times by over 30%, resulting in a smoother user experience.

TEACHING EXPERIENCE

Kyungpook National University

Teaching Assistant

Daegu, South Korea

Mar 2024 — June 2024

- COMP0743: ML with Application in Information Security (hidden Markov models (HMM), principal component analysis (PCA), support vector machines (SVM))

VOLUNTEER EXPERIENCE

St. Claire's Girls' Grammar School

Instructor (Computer Science & Mathematics)

Offa, Nigeria

Nov 2021 — Dec 2022

- Improved students' performance in mathematics and computer science from 35% to 65%.
- Designed and delivered curriculum aligned with national standards.
- Conducted group and one-on-one instruction to enhance student engagement.

TECHNICAL COMPETENCIES

Tools & Languages: PyTorch, HuggingFace, Python, C++, JavaScript, SQL, Git, AWS, GCP
